

CALIFORNIA DATA CENTER ALTERNATIVE

THE SMART CHOICE. When choosing a data center solution, today’s smart enterprise seek the right combination of assets to reliably and cost-effectively host their mission critical data today and in the future. Located in the Seattle metro without the in city risks, companies from California already rely on rock solid Centeris SH as their primary or secondary data center for high performance compute, active-active, cloud computing, mirror, backup and archive purposes.

CLOUD CAPITAL OF THE WORLD

Strategically Located

- Strategically Located: Near Seattle without being in the city, providing reliable redundancy with minimal latency; All the benefits of being in a major metro market without the risks
- Secure: Industry’s highest levels of security on dedicated, private campus built on solid bedrock to exceed seismic standards
- Cloud Capital of the World: Abundant Tech Talent

Direct Routes to CA + Gateway to Asia

- Connected: Centeris’ Transpacific Hub® provides a direct link to the U.S. and Asia
- Uninterruptible: Redundant north-south fiber routes
- Accessible: Dense fiber networks connect key Network Access Points (NAPs) and Points of Presence (POPs) to subsea cable stations
- Dark fiber bandwidth options and direct connections to public and private clouds

GLOBALLY CONNECTED

INDUSTRIAL POWER + CAPACITY

Never Run Out of Space or Power

- Powerful: Largest power-available facilities in the US
- Reliable: Exceed 99.999% uptime and continuously monitor all operations and infrastructure
- Capacity: 50-Megawatt dual-fed dedicated on site substation
- Future proof: Expandable as to never outgrow our capacity

Highly Efficient Evaporative Cooling

- Green: Easy access to abundant clean, sustainable power sources.
- Sustainable: LEED Gold facilities
- Affordable: Low 1.3 annualized PUE
- State-of-the-Art: Evaporative cooling system utilizes 100% outside air

GREEN LOW COST POWER

“With more than 65 million active users of our cloud-based games, we truly have zero margin for error. Centeris’ reliable uptime, security, ability to easily handle our growth and needs in areas ranging from high density rack deployments to overall ease-of-use makes them an invaluable partner.”

-IT director, global cloud gaming company headquartered in Bay Area
