

## Centeris Partners with Comcast Business Services to Expand Network Connectivity in Seattle

*New High Capacity Deployment in Centeris South Hill Data Center Campus to Benefit Both Companies' Customers*

SEATTLE (March 17, 2014) – Centeris, a leading infrastructure provider for cloud and enterprise mission-critical IT, announced today that it has partnered with Comcast Business, a global media and technology company, to provide direct access to Comcast's high performance network.

The new relationship allows both Centeris, which operates the most secure, efficient and resilient data center campus in the Pacific Northwest, and Comcast Business Services to offer a set of solutions designed for today's IT infrastructure requirements. Centeris and Comcast's diverse community of clients now have access to a range of robust connectivity options as well as high-powered data center capacity needed to ensure systems availability while also providing flexibility to meet specific customer needs.

"Centeris is delighted to welcome Comcast into our Seattle area data centers," said Simon Lee, Director of Centeris.

"Comcast's Edge Gateway node provides a direct link to one of the most extensive networks in the country, enabling the Centeris ecosystem to reach millions of households and enterprise users even faster while strengthening our position as a gateway for strategic carrier interconnection and serving a critical hubbing function for transpacific data communications."

"We are excited about our Centeris partnership as we offer truly complimentary services. By bundling our high-capacity, scalable network services with Centeris' state of the art data center, we create true value for businesses. Centeris delivers a world class facility in a strategic location for a more resilient network and key enterprise applications whereas Comcast Business provides businesses with secure, fiber-based connectivity to them, essentially making Centeris a high-performance node on a customer's network." Director, Dave Eller.

### **About Centeris**

Centeris is a leading infrastructure provider for mission critical IT and networking systems located in the Seattle area. By integrating innovative design with proven energy efficient and environmentally sustainable technologies, Centeris provides abundant reliable power with robust critical infrastructure and efficient data center operations. Privately held by The Benaroya Company, with facilities in the Northwest including Seattle and Boise, Centeris possesses the operational flexibility coupled with the financial strength to respond to current and future requirements with speed and certainty.
