

SH2 POWERED SHELL

Offering high power capacity and scalability, SH2 is a powered shell ready to be built out to your specifications. Highly flexible, with 80,000-174,000 square feet of fully configurable white space available for your exact mission critical requirements.

SH2 provides all the benefits of being located on the private 86-acre South Hill campus including robust connectivity and a gateway to Asia via the Transpacific Hub®. Centeris makes fast deployment possible with a 12–24 MW build-out commissioned in 9–12 months.

BUILD-TO-SUIT

WWW.CENTERIS.COM/TOUR

FEATURES INCLUDE:

- FULLY CONFIGURABLE TO CLIENT'S SPECIFICATIONS
- 12 MW - 24 MW BUILD-OUT COMMISSIONED IN 9 - 12 MONTHS
- STRATEGICALLY LOCATED IN PUYALLUP, WASHINGTON

FACILITY SPECIFICATIONS

Offering high power capacity and scalability, SH2 is a completed powered-shell ready to be built out to client specifications.

Data Center Floor Plan
2nd Floor

WHITE SPACE

Two floors

80,000-174,000 square feet of white space available

POWER

Up to 30 MW available today

50 MW dedicated substation on-site; expandable in 25 MW increments

Dual feeds from independent utility substations

Low power cost

MECHANICAL

MEP (Mechanical/Electrical/Plumbing) conceptual design completed
